### **Declaration concerning the new Construction Products Regulation (CPR), which takes effect as of 01.07.2013.**

Dear Business Partners,

The new Construction Products Regulation (CPR) takes effect as of 1 July 2013. As European regulation the CPR applies directly in all member states.

Construction products which come into circulation after 01.07.2013 must comply with the CPR.

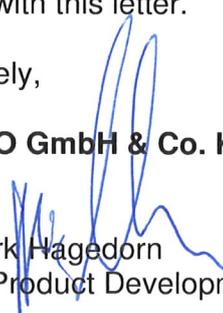

This new CPR pertains to all products which, on a European level, are covered by a harmonised standard or correspond to a European technical assessment.

For the KEUCO company, only washbasins (EN 14688:2018) are covered by this new regulation. For the other product areas (fittings, accessories, care products, mirror cabinets/light mirrors, bathroom furniture) there is currently no harmonised standard. However, it should be noted that the KEUCO company satisfies all German standards in all of its product areas.

A corresponding Declaration of Performance for the product group "washbasins" can be found with this letter.

Sincerely,

**KEUCO GmbH & Co. KG**

  
P.P. Dirk Hagedorn  
Head Product Development
