

Art.Nr. 280 1000 S

[illegible]

This exploded view diagram illustrates the components of a faucet assembly. At the top is the faucet handle, which is curved and has a lever. Below the handle is a circular plate with a central hole. Underneath this plate is a curved, C-shaped component. To the left of these components are two sets of threaded rods with decorative rings. In the center are two long, thin rods with a small cylindrical component at the bottom. To the right of these rods is a long, thin rod with a small cylindrical component at the bottom. At the bottom right is the faucet base, which has a circular top and a threaded stem. A long, thin rod with a small cylindrical component at the bottom is shown extending from the base.
